

Legends

(von Francesca Buri / www.francescaburi.ch)

*There are legends that say that we will evolve, evolve in a way we can't yet
imagine*

*There are legends that say that these times will bring great changes
There are legends that say that we will be masters of our minds
There are legends that say that we will be creators of our own universe*

*And they say that we can find God in ourselves
And then we will be entirely free*

*I believe that it's true
And God lies in me and you
I believe that it's true
and God lies in me and youu...*

*In the magic forest on the holy mountain grows the wishfullfilling tree
Kalpatara is told to let all your wishes become true
Therefore be careful all you seekers of what you wish and what you want
Cause when it turns into reality it may does not suit you at all*

*And they say that we can find God in ourselves
And then we will be entirely free
And they say that we will find God in ourselves
And then we will be entirely free*

*I believe that it's true
And God lies in me and you
I believe that it's true and God lies in me and youuuuuuuu...*
