

On my way

(von Francesca Buri / www.francescaburi.ch)

*I wanna walk just right this way
I wanna keep walking day by day
And I want to sing that song that I love
I wanna keep singing day by day
All along that way that leads me*

*Through hope and fear and joyful moments
Laughter and despair
Through times of wonders and gratefulness
Where all my visions are cristal clear visible in the air*

*I wanna walk this way right here
I wanna keep walking without fear
And I want to sing the song that I love
Always trying to catch a little view from above*

*And I believe that all the mistakes that have taken place
Merit the same as all the miracles that are part of my life*

Nananananananananana...

*Wanna keep walking day by day
Singing the songs that I love
And I want to see the beauty in the world
In every creature that's alive*

*Golden is the mist that veils the secret of life's mystery
Clear and blue the wind is carrying away my thoughts and give them wings*

*And I believe that my thoughts are flying in front of me
And lead me through and help me flying on my way too*
